

E-DESIGN  
**MEASURING GUIDE**

- 1 To fully understand your space, we require precise measurements that include the following: - Room dimensions with the location and shape of all windows (in centimeters).
- 2 Door dimensions, both with and without the architrave, along with the direction they open (left to right or right to left).
- 3 If applicable, provide the location and dimensions of the fireplace, including hearth dimensions.
- 4 We need the ceiling height; door heights; heights of counter tops; height of windowsill to floor and top of window to the ceiling.
- 5 Please indicate the location of wall lights, ceiling lights, and pendants as well as the placement of light switches and power sockets, whether existing or needing installation.
- 6 Additionally, include the location and size of radiators or television.s.
- 7 Architectural drawings are not necessary. You can print the floor plan of your property from an estate agent and mark the measurements on that, then photograph and upload with your E-design form.
- 8 A hand-drawn floor plan is also acceptable, as long as you clearly indicate which measurements correspond to each wall.
